If you have selected at least a "Strongly Disagree" or "Disagree" option with one of the previous statements on COURSE DESIGN, INSTRUCTIONAL PRACTICES, ASSESSMENT PRACTICES or COURSE IMPACT, please describe a change that would improve that aspect of the course.

Students
I clicked disagree as most of the feedback for my work is from my TA, but for discussions and presentations, I felt like the feedback could be more detailed and constructive.
N/A
I pressed disagree on the box titled, "The course objectives were well explained" as I thought this class would be focused more on studying property, money, and markets through an Economics lens. However this class was purely philosophical not really touching Economics. I would suggest to change or alter the course title to better reflect that this is primarily a philosophy class not an economics or philosophy of economics as we spend majority of time covering topics like decision theory and game theory.

Is there additional information or feedback that you would like to share with instructor Antonio Maria Cleani ?

Students
Thank you for being so kind and open during discussions and as an instructor in general. I enjoyed my first time of learning proper philosophy from you.
A great instructor, I've never met someone who's this welcoming and encouraging. He is a great teacher and open-minded to all sorts of ideas.
Thank you for a great course!
No, overall he has been an amazing instructor, and I am very grateful to have had him teach me.
The course was truly great, I had so much fun this summer, and I am really thankful for all the works you put into making this class so great and unforgettable.
Playing the Hide-and-go-Seek was super fun
I was not a fan of the afternoon reading structure, but considering it was a 50/50 split, I guess my personal opinions aren't reflective of the course's overall quality.
No, I thought he was a great teacher and that the class was difficult. I had a good time navigating the difficulties of the philosophical concepts he was introducing.
Antonio was so dedicated to everything he was teaching, and from what I could tell he loved being here with us every day. He was great!
Antonio did a great job at explaining the concepts well while making them interesting. He was exceptional at connecting with the students and a good person in general.
Thanks for a fun summer!!

Comments
Antonio's enthusiasm for philosophy and also class discussions
Learning about why philosophy matters and why the current government system is built like this. Creating connections between philosophy and economics. Engaging in group discussion that would create many aspects of the point of view on a problem. Learning about what constitutes a good choice versus a bad one in life, particularly when making decisions.
I learned about things that I would have never learned in school, giving me insight to what I may want to study in the future.
I think it is when we together to play the game about our class, it was let me learned a lot of thing very quickly.
The most valuable aspect of this course was learning a subject that my school doesn't offer, which gives me insight into my career goals and which majors I want to pursue in the future.
Engaging in discourse on challenging or defending certain philosophical ideals we learned about
I think it is getting down to knowing all the theories and values behind decisions not only in economic aspect, but also in general life situations.
It was fun and valuable learning about real life situations so we could apply to concepts to ourselves.
I enjoyed the philosophical part, especially when one viewpoint, such as Libertarians, would be pro-child labor and then 5 minutes later they aren't, or when someone takes a completely different approach to answering the question, but their answer is well-substantiated through a clear thesis and quality argument points. Debate is the stimulation of the brain's stuff – Zach Bernstein. I enjoyed the boba too, only the taro tho.
Note: Ngl I chose 8 hours of work, but I would really just sit in the library for 2 hours and work like 30 minutes at best. I got an A tho
The ability to critically think to come to a decision.
The similarity to actual collage courses where great, and it truly gave me a perspective of what USC 's rigger is.
The Game theory section (so far)

Comments
The everyday quizzes
Everything was valuable in some respect.
None. Everything was good.
learning all the paradoxes and theories behind Game theory and Decision theory, rather than spending more time on applications.
N/A
Everything was valuable.
It was really long even though the material could've been covered in shorter time, But I guess this is because all USC courses are 5 hours long.
I don't know
I think the length of the course was slightly to much because we always found ourselves doing extra random things at the end of the day.
Maybe how far we went into decision theory, but nothing was non-valuable
