Students

The professor was unable to accommodate during class the needs and learning ability of students. Useless course because I did not learn or understand anything. He made the class a lot harder (he said this himself) to make it more challenging for us. I hated this class and professor.

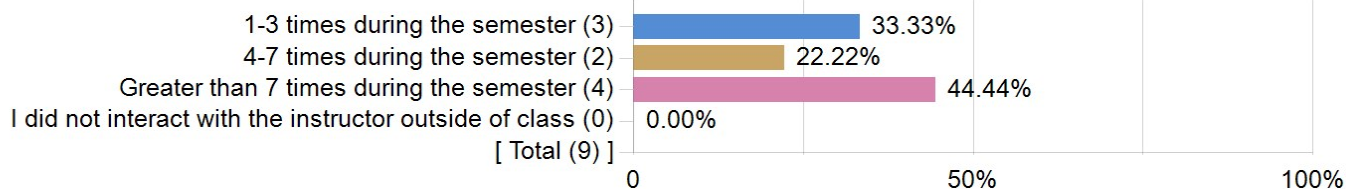

Is there additional information or feedback that you would like to share with instructor Antonio Maria Cleani ?

Students
Antonio was a great professor for this course
The only suggestion I have for this class is the concepts sometimes are too difficult to understand especially for an introduction class. The concepts went over quickly during class, and it is very likely to be confused even with the practice class. Students may lose their interest in logic if the class is too hard. I would suggest to slow down and cover less concepts for future class.
Don't hire him.
In the future, I think you should try to ease the learning curve a little for students. It got better as the semester went on, but at the beginning of the semester it was insanely difficult to understand most content.

Comments
Learning how to think through the lense of logic is unique and probably helpful to learn.
I really liked the weekly assignment format and the flexibility with the more difficult assignments. The exercise classes were super helpful
It challenged me a lot and Antonio was flexible
Explore different areas of logic reasoning
Literately none if you count my weekly breakdown session.

Please describe the LEAST valuable aspect(s) of this course.

Comments
I think the content of just learning logic might be a totally useless thing. Maybe not though.
Before we started doing exercise classes, some of the concepts were a bit difficult
It was ridiculously hard and not what I had thought I signed up for
