Is there additional information or feedback that you would like to share with instructor Antonio Maria Cleani ?

Students
I truly found office hours and discussion sections to be valuable in this course. Antonio was so helpful and dedicated a lot of time and effort in helping me understand the material. He was key in my success in the course.
Very helpful, extremely patient, explains really well, is very passionate

If you have selected at least a "Strongly Disagree" or "Disagree" option with one of the previous statements on COURSE DESIGN, INSTRUCTIONAL PRACTICES, ASSESSMENT PRACTICES or COURSE IMPACT, please describe a change that would improve that aspect of the course.

Students
In regards to disagreeing with the last statement in Course Impact, I am a Cinema and Media Studies major, so I do not see this course playing too much into my future career path.
In Assessment Practices, I found that there was little feedback to be found from the instructor on the quality of my assignments. While I did get instruction through one on one meetings, I saw no evaluation of my performance in this class beyond that, and grades.
In Instructional Practices, I just that most of the ways in which we approached the material was very straightforward and formulaic, not necessarily diverse in its applications or approaches. It's logic, it's formulaic.
Antonio is a great TA but his discussion sections are quite boring and tedious.

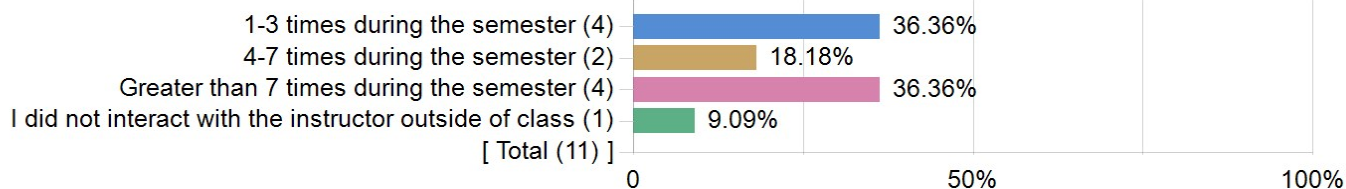

Is there additional information or feedback that you would like to share with instructor Antonio Maria Cleani ?

Students
No
Thank you so much for all your help this semester!! You really made all the difference in helping me understand the material and feel prepared for every test.
I think he was great. The best TA I've had to date. Give him a raise.
Antonio was a great TA! Super helpful and made himself available for office hours and test retakes. Very responsive over email and overall very kind. He wants his students to succeed.
I wish he went over the exams and assignments more in the beginning of the semester.
I really appreciate the time you took in delivering handouts which were an extension of class material. Best of luck in your future ventures and thank you for being so receptive to your students!
I definitely would not have passed this class if not for Antonio. He was very patient with explaining and reexplaining concepts to me that I did not understand and was very accommodating to make time to meet even outside of his office hours. He genuinely cares about the students success which is rare and is very motivating when the concepts are difficult to grasp. He was very kind in all of his teaching endeavours and given that no one in class had taken logic before and he has a very advanced knowledge of it, he was very good at explaining concepts in basic terms to make it more understandable for students who were struggling.
My only critique of this discussion section would be that sometimes I felt that the activities were slightly too advanced/unrelated to what we were learning in class. I understand that this was meant to challenge us and make us apply the material. However, personally, at times I felt I would have benefitted from more explanation/practice of the fundamental principles rather than more transfer-based activities. Other than that, this discussion was helpful and instructor Cleani was great!

Comments
I believe that the approaches we learned to dissecting arguments may prove helpful in my field as a minor in data analytics
I went to the majority of office hours and I would say that those helped me so so much. In addition, the quick responses to any email questions was also so helpful.
Critical thinking
This course was incredibly challenging but helped me hone my critical thinking skills.
I LOVE the weekly assignments, and the USC logic web is also super helpful.
Learning different ways to judge validity of various arguments.
Increase in Critical thinking abilities. One of the first classes at USC that really had me thinking and trying to understand in depth explanations on really difficult to grasp topics
Having a space to ask clarifying questions on the assignments was very valuable.
Introduced me to a new area of study I have no prior experience with, and in the future, can potentially be applied to other classes for my major if I chose to take another logic course.

Please describe the LEAST valuable aspect(s) of this course.

Comments
Sometimes it was a bit hard to follow in class
None.
Language of logic
I wish we could have applied the technical logic that we learned to actual arguments from well known philosophical works.
The discussion section is unnecessary due to how in depth we go during lecture
Maybe further applications of how these logical processes we cover apply to practical scenarios could be worth a class period.
Content felt too loaded for some classes and in some classes it felt as though the prof rushed through just to be done with his quota for the day. But not a big deal as Antonio helped understand the work in office hours
I mean the content is just generally very confusing and it is so easy to get lost especially when you feel like you don't have strong guidelines or rules that are always or at least most of the time applicable
Sometimes, as previously stated, the assignments in discussion were a bit too advanced/challenging compared to test material.
Although the material was engaging and thought-provoking, If I don't take another logic course, it won't be very applicable to my area of study.
