LEARNING EXPERIENCE SUBSCALE ANALYSIS

Learning Experience Subscale Average Score

Competency	Course-instructor	Standard Deviation
Course Design	3.59	+/-0.59
Instructional Practices	3.67	+/-0.54
Inclusion Practices	3.57	+/-0.57
Assessment Practices	3.39	+/-0.70
Course Impact	3.63	+/-0.58

COURSE DESIGN

	N	Mean	Std. Deviation
The course objectives were well explained.	21	3.52	0.60
The course assignments were related to the course objectives.	20	3.75	0.55
I understood what was expected of me in this course.	20	3.50	0.61

INSTRUCTIONAL PRACTICES

	N	Mean	Std. Deviation
The instructor carefully explained difficult concepts, methods, and subject matter.	20	3.65	0.49
The instructor encouraged me to do my best work.	20	3.55	0.60
The instructor encouraged questioning and discussion of course topics from the students	20	3.80	0.52

INCLUSION PRACTICES

	N	Mean	Std. Deviation
The course materials included diverse perspectives OR applications to diverse populations.	20	3.55	0.60
The instructor used a variety of teaching approaches to meet the needs of all students.	21	3.43	0.60
The instructor was receptive to the expression of diverse student viewpoints	19	3.68	0.48
The instructor demonstrated sensitivity to students' needs and diverse life experiences	19	3.63	0.60

ASSESSMENT PRACTICES

	N	Mean	Std. Deviation
The assessments/assignments reflected what was covered in the course.	20	3.60	0.60
The grades I have received thus far reflect the QUALITY of my performance in the course.	20	3.25	0.85
The criteria for good performance on the assignments or assessments were clearly communicated.	20	3.30	0.73
The instructor's evaluation of my performances was constructive.	20	3.40	0.60

COURSE IMPACT

	N	Mean	Std. Deviation
I learned perspectives, principles, or practices from this course that I expect to apply to new situations.	21	3.62	0.59
This course challenged me to think critically and communicate clearly about the subject.	21	3.76	0.54
This course provided me with information that may be directly applicable to my career or academic goals.	20	3.50	0.61

LEARNING EXPERIENCE SUBSCALE ANALYSIS: COURSE DESIGN

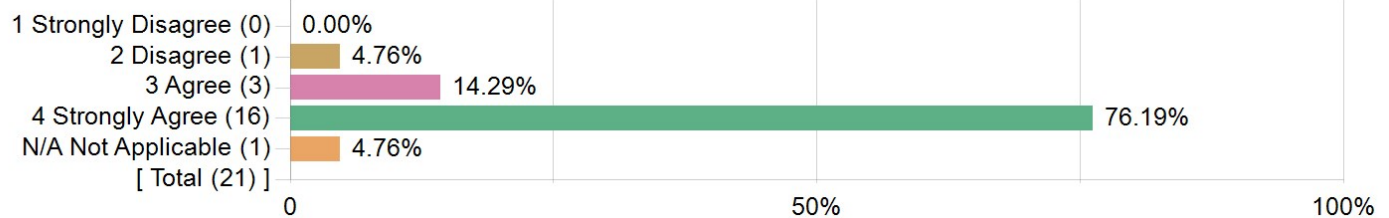

COURSE DESIGN

	N	Mean	Std. Deviation
The course objectives were well explained.	21	3.52	0.60
The course assignments were related to the course objectives.	20	3.75	0.55
I understood what was expected of me in this course.	20	3.50	0.61

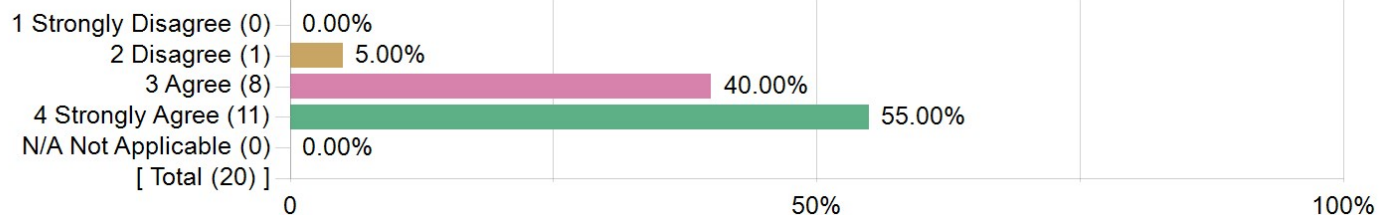

1. The course objectives were well explained.

2. The course assignments were related to the course objectives.

3. I understood what was expected of me in this course.

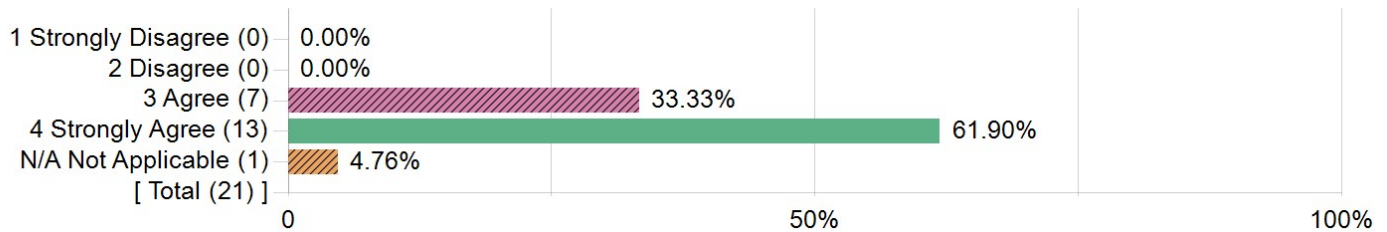

LEARNING EXPERIENCE SUBSCALE ANALYSIS: INSTRUCTIONAL PRACTICES

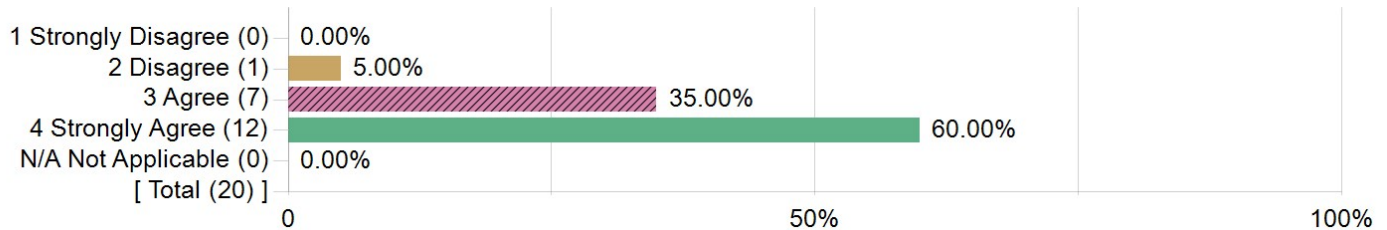

INSTRUCTIONAL PRACTICES

	N	Mean	Std. Deviation

2. This course challenged me to think critically and communicate clearly about the subject.

3. This course provided me with information that may be directly applicable to my career or academic goals.

If you have selected at least a "Strongly Disagree" or "Disagree" option with one of the previous statements on COURSE DESIGN, INSTRUCTIONAL PRACTICES, ASSESSMENT PRACTICES or COURSE IMPACT, please describe a change that would improve that aspect of the course.

Students
I still think the grading criteria, whether for essays or quizzes, are not sufficiently transparent. For quizzes, it would be helpful if the correct answers were provided after grading so that students can understand their mistakes and know what is expected in future assessments. For essays, some prompts involve ambiguous philosophical arguments, yet they do not clearly define the scope of acceptable discussion. At the same time, the grading rubric provided by the TA is quite broad, making it difficult to understand how our work is evaluated or how we can improve. In my opinion, this level of transparency is not sufficient for meaningful reflection and academic improvement.
I think Antonio is a great person. He has a positive vibe while leading activities. He is patient and nice with the students. However, I think this course can improve by incorporating more discussions. I think the discussion within students is too less. I think this course can improve by having more discussions within students on philosophical topics .
For essays, we were only given a prompt, but no rubric; although some things were said to us in person, it was very general. I think a rubric with concrete ways that we can do good would have helped me, or a google doc with instructions on it.
I thought the teacher could be clearer when describing the assignment objectives as I slightly misunderstood what we were supposed to do and maybe next time there should be an example so we know more specifics about the essays we should write
Sometimes I feel that the lecture is a bit unclear. Basically, I felt like I learned most of the knowledge on my own. Maybe next time, do the quiz after the lectures are fully done.

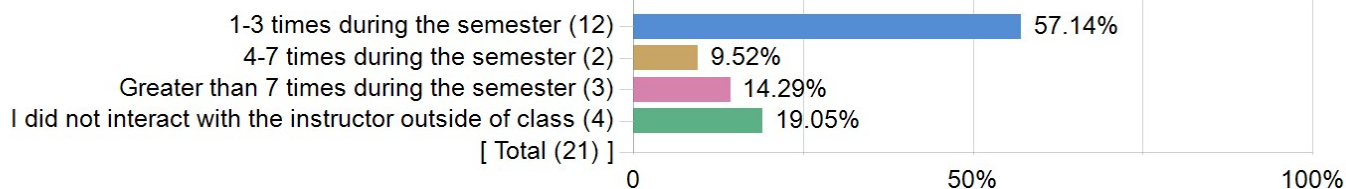

Is there additional information or feedback that you would like to share with instructor Antonio Maria Cleani ?

Students
I believe we should incorporate more activities into our class. He did a pretty good job of teaching us.
I really enjoyed having you as my philosophy professor this semester. Before taking this class, I thought philosophy would mostly be about memorizing different philosophers and their ideas, but you made it much more interesting than I expected. I liked how you encouraged us to think for ourselves instead of just looking for the "right" answer. It made class discussions more engaging and helped me see how philosophy connects to real life.
One thing I'll take away from this class is the importance of questioning my own assumptions and looking at problems from different perspectives. I think those are skills that will be useful beyond this class.
I think that Antonio Maria Cleani is a very respectful and good proffessor who teaches us students well, and he is also an extremely passionate man about his field of study in philosphy.
Professor Antonio is a respectful instructor who demonstrates great patience and encourages critical thinking throughout the course. He provides us an environment where students feel comfortable expressing their ideas and engaging in philosophical discussions indeed.
That said, I believe there is still room to make the class even more engaging. For example, incorporating a greater variety of teaching methods, such as video, debates, or interactive activities, could encourage broader participation and help students stay more actively involved. Overall, I had a positive learning experience and appreciate the effort Professor Antonio put into teaching this course.
If he could call out the students on the phone more, as many people lack discipline and I felt like when he did it near the end, the whole class was much more engaged. Also if he could ask questions to specific people like explicitly calling out people who don't ask much questions to increase total class participation
Actually no, but I think it is very easy to get distracted when listening to the "abstract" concept of the readings for 3-hour lectures...
This class was very nice. I enjoyed his teaching methods. The structure of the class was also well thought out. It was extremely incremental to my academic development, at least I think so.
Really liked all the games!! Super super fun
I love that you always consider everyone's perspectives no matter how unique

STUDENT ENGAGEMENT ANALYSIS

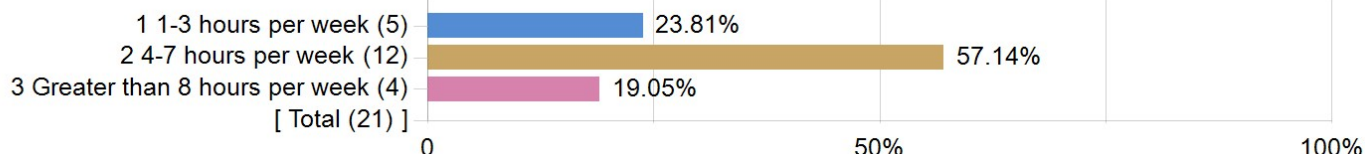

Number of Instructor Interactions Outside of Class

Approximately how many times did you interact with instructor Antonio Maria Cleani outside of class? (e.g., via email, office hours)

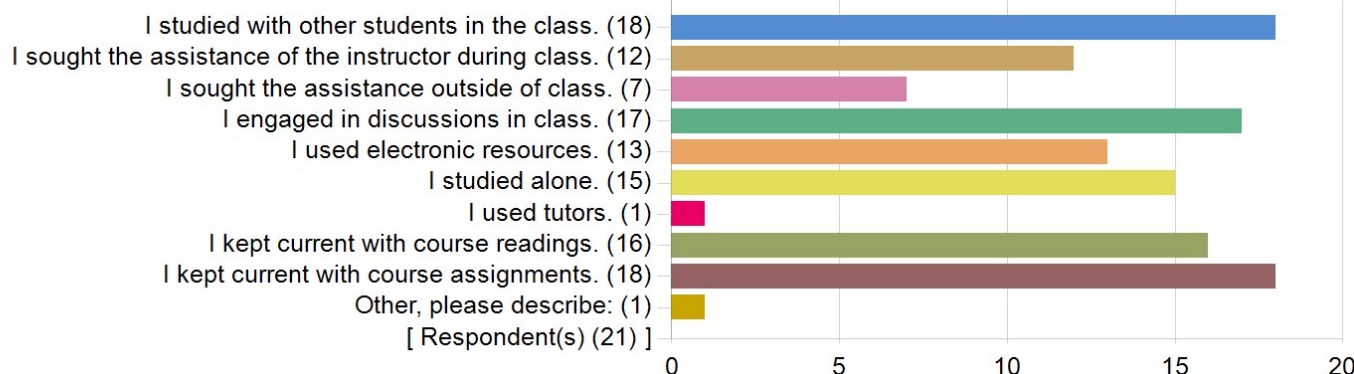

Approximately how many hours did you spend on coursework outside of the classroom?

Approximately how many hours did you spend on coursework outside of the classroom?

In what ways have you participated in your learning for this course? (Please select all that apply.)

Please describe the MOST valuable aspect(s) of this course.

Comment
discussions, simsoc simulations
The most valuable part of this course was how it encouraged me to think critically instead of just memorizing information. The class discussions made the material more interesting and helped me see how philosophical ideas relate to real-life situations. I also appreciated that everyone was encouraged to share their perspectives, which made the class engaging and made me think about topics from different points of view.
Learned to think critically and write essays about different philosophical arguments based off famous authors such as Locke, Hume, Arneson, Sen, and Rawls.
Gain a comprehensive understanding of the relationship between philosophy and economics, while engaging with diverse perspectives from participants with varied backgrounds.
Learning about different philosopher's views of things like property rights, markets and property.
The course did leading students toward philosophy field that could improved students' critical thinking and better understanding to this world.
Activities. SIMSOC was fun.
critical thinking, simsoc game
The most valuable aspects of this course were the daily readings and quizzes, and also the discussions to help us understand hard topics better.
The SimSoc game as that is an experience you can only have in a class like this
It really helped me understand what is the base of the economics.
Get to know at least some basic concept of what is going to discuss in class, even though it's really confusing
This is encompassed, by the material thought, the way in which it is skillfully explained, the accuracy of the interpretations of the material, and the variety of thought we receive on different topics. It is very helpful to have this course taught in the way it is being conducted.
I then applied the readings, from which I learned a lot, during the class discussions and quizzes.
All the theories I really really liked and the discussions. Gave a lot of insight and also really helped mix the readings into real life situation and made me understand more.
I found the most valuable aspects being the actual philosophy analysis and game theory that we learned. This practice genuinely helped me think very critically about societal functions and economics as a whole.
It broadened my horizons and let me view a lot of different knowledge that I wouldn't have had opportunities to engage with without this course.
The most valuable aspect if this course were the quizzes we took.
learning about philosophy

Please describe the LEAST valuable aspect(s) of this course.

Comment
quizzes not gonna lie i feel like it was a bit random
I honestly don't think there was anything that stood out as a major negative. If I had to choose, I think some of the readings were a little dense and could be difficult to get through at times. Spending a little more time breaking down some of the more challenging texts in class would have made them easier to understand.
Did not take time in class to go over essays.
Learning about the game SIMSOC, though it was not something I enjoyed a lot exactly
The course name did contains economics,money,market.However I found the main content didn't cover much about those subjects directly.
Sometimes there's too much lecture and too little interaction, especially interaction within students.
peterson textbook, some of the readings could have been conversations/taught in lectures so that we did not need to spend so much time to read them. going into quizzes with only what we comprehended in readings, but then teaching the information in the assigned reading after we did the quiz seemed counter-intuitive to me.
All aspects of this course were extremely valuable, but one aspect that is not as essential as the rest were maybe the field trips, as some of them were unrelated to the course. However, I understand the importance of them as they helped build a community and helped us be comfortable with our classmates.
The tests in the morning
none
Having quiz every day:((((that's really suffering
I don't know.
Not sure
Maybe too many pages
The least valuable aspect was most likely the second SIMSOC as by that time most people didn't value it very much. I also think a problem may have been that the point system wasn't as strict and so people thought they didn't need to do a lot in the second SIMSOC in order to succeed.
N/A
The field trips weee the least relevant to the course but I genuinely found a new interest in art from the museums we toured and plan on visiting an escape room in the future.
the busy work that i did not enjoy
